SUMMARY

With two-year experience in IT field, I possess versatile mid-level technical skills: full-stack programming, web scraping and database, as well as product-oriented skills: mobile app UI/UX design and agile development flow.

Both MIS and MBA background cultivates myself as a proactive, flexible, and creative person. Besides, currently I am studying further essential basics(AI, Data Analysis, Machine Learning, etc.) for being a data engineer and working around the world.

EXPERIENCE

WAU YUAN PROPERTY APPRAISAL CO., LTD.

Kaohsiung, Taiwan

SOFTWARE ENGINEER

March 2018 - October 2018

- Collected data via web scraping for building financial databases(Python/MariaDB).
